

Water is Life

Water is life, and so much more. So, why all of the excitement about common H2O?

Water is a glue that bonds all of life on earth together. Without it, we would not exist. With it, not only do we exist, but we have one powerful tool to aid us with our growing energy problem.

How so you may ask?

Water can be broken down to produce hydrogen, a clean energy carrier. Hydrogen generated from water is abundant, non-polluting, and is eternal in nature. Unlike compressed hydrogen or other more common fuel sources, water can be stored safely, without risk of fire or explosion. There is more hydrogen in a liter of water than there is in a liter of liquid hydrogen!

Through the application of the Bob Boyce? catalytic technology, Hydroxy Gas? can be generated, on demand, from water. If we use this technology to split water efficiently, and we use the generated Hydroxy Gas? wisely, the source water is never lost. After using the Hydroxy Gas? to perform work for us, we release the byproduct into nature as clean water vapor, where it will be returned to us once more as liquid water by the earth's water cycle.

Hard to beat!

Will the ever-increasing greed of big government, big oil, and big business, ever be satisfied enough that they can stop destroying this planet at everyone else's expense? I really doubt it.

There is energy aplenty in the wind, the sun, in flowing rivers and waterfalls...

Even in a cup of water, latent there, just waiting for the adventurous...

Go for it!

One good site for learning about Hydroxy Gas? production is;

TRADEMARK NOTICE

The term Hydroxy Gas? is a declared trademark that describes a blend of hydrogen and oxygen gas that is generated by catalytic cells of the Bob Boyce? design. This term was originally coined by Bob Boyce?, and was openly declared as a trademark by Bob Boyce? prior to 2006. Non-commercial use of this term by the public is permitted and encouraged. However, all COMMERCIAL rights to the use of this declared trademark are reserved for use by Bob Boyce?, his licensees and/or assignees.

The declared trademark Bob Boyce? is an aka name for, and has been a declared trademark of, an actual living individual, Norman Robert Boyce, as of October 4th 1978. This declared trademark is the legal property of Norman Robert Boyce.
